St Lawrence CE Primary School

Information and Security Policy

Ref: STLAW.069 Version 1.0

Revised: March 2019

Consultation with staff and Governors

and adoption of policy: Spring Term 2019

Review date: Spring Term 2020

Including Acceptable Use No: 5.3-17

Endorsed by: Managing Director

Assistant Director: Governance, Procurement & Commissioning (Senior Information Risk Owner)

IMPORTANT NOTICE - ACCEPTANCE OF THIS DOCUMENT

This policy and all associated policies applies to all full time and part time employees, casuals, volunteers, temporary/agency staff of the Council and all contracted third parties working for the Council and partner employees, whether they are working on Council premises, at their offices or at any other premises, including their home.

As a minimum all new starters, Team Leaders, Service Delivery Managers and the Senior Management Team must read this full version of the CISP. Other officers may be made aware of their information security responsibilities by reading the <u>summary version of the CISP</u> dependent on their role and the nature of information they are accessing.

Where relevant you are **required** to have read the information in this document. **Please indicate that** you have done so when you log on to your computer or by completing and signing the Acceptance Form at the end of this policy (<u>for non-pc users only</u>).

Additional guidance to this policy will be made available and can be accessed via the <u>Information</u> Governance (IG) page of the Councils intranet.

Please contact IG on 382537 or email <u>ig@telford.gov.uk</u> if you need help with this policy, additional guidance or require information in a different format, e.g. Braille.

1. Introduction

1.1 Information can exist in many forms. It can be printed, written, stored electronically, transmitted by post, email, fax or even spoken in conversations. The purpose of information security is to ensure that all information (including personal information) and associated processing systems are protected to an adequate level to prevent distress or have any negative impact on the Council and its services.

2. Scope

2.1 This policy sets out minimum standards and common acceptable use for confidentiality, integrity and availability of information to meet internal and legal requirements.

Confidentiality Ensuring that information is accessible only to those authorised to have access

Integrity

Safeguarding accuracy and completeness of information and processing methods

Availability

Ensuring that authorised officers have access to information when required.

- 2.2 The policy has been written to conform, where possible, to standards such as ISO 27001 (Information Security Management standard), HMG Data Handling Guidelines and PCI-DSS (Payment Card Industry Data Security Standard).
- 2.3 This policy supports all of the Council's co-operative values but in particular contributes to the openness and honesty of Council business by balancing the use of information with the implementation of measures to safeguard and respect this information.

3. Roles & Responsibilities

3.1 All officers within the Council have a responsibility to ensure that they take steps to safeguard the security of the information that they are using and seeing.

All officers must:

Read and comply with this policy (including linked acceptable use policies)

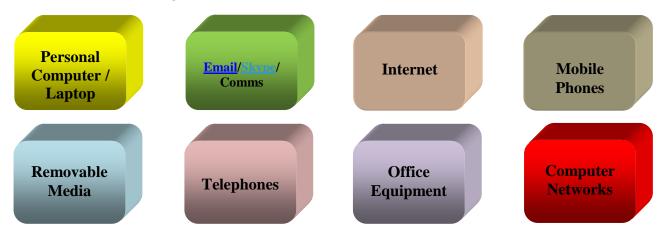

Read and comply with the <u>Information Security Breach Procedure</u> (ISBP) <u>Procedure</u>

Be personally responsible for information held by them

4. Acceptable & Unacceptable Use

4.1 The Council will not tolerate the use of any of its equipment/information for any purpose which contravenes this policy and associated policies/documentation. Officers found not complying with these requirements may be subject to disciplinary action. This policy covers the following areas of use:

To view what is acceptable use and non-acceptable use for each of the categories above press the 'Ctrl' key and click on the relevant topic above.

Officers should also ensure they are familiar with the requirements of other related policies on records management, data protection and social media.

5. Asset & Information Classification

5.1 In order to make sure that the Council's information/assets receive an appropriate level of protection, all information will be treated in accordance with the requirements of ISO 27001 (Information Security Standard).

Asset Accountability - All major assets (and associated licenses), whether physical or information/software, have identified "owners". The asset owner is accountable for the maintenance of the asset. ICT maintain an asset register of ICT related equipment and software.

Information Classification - Information Governance has a high level classification structure of information that will be used to inform future corporate records management programmes. New information management structures at a local level must be in line with the classification determined by Information Governance to aid the transition in future to a corporate wide file plan.

Information Labelling and Handling - Information being stored in whatever form should conform to labelling and handling standard (i.e. naming conventions) detailed in the Records Management Policy. Information Governance can be contacted for more information on this.

6. Information Sharing

IMPORTANT – KEY MESSAGES

- You should only share personal identifiable information (PII Data about an individual that could, potentially identify that person) where there is legal justification to do so.
- You should know the objective/reasons for sharing PII.
- You should investigate whether the objective can be met without sharing PII.
- You should only send the minimum PII definitely needed to meet the objective/reasons.
- You should, where possible, anonymise the information you send so it is not personally identifiable
- You should confirm the recipients contact details, e.g. postal address, email address, etc. before sharing information
- You should appropriately protect the PII you are sharing either by using a secure solution if it is electronic, sending post by special delivery/courier, etc.
- 6.1 The Council will, where there is a defined justifiable purpose, sign up to information sharing agreements with partner organisations, where these agreements are within the boundaries of applicable legislation and regulation and do not compromise the Council or the confidentiality of the personal and/or sensitive data that it holds.
- 6.2 The Council will have put in place information sharing agreements where regular sharing of information from Council systems/records takes place.

- 6.3 Information Governance has produced a standard <u>data sharing agreement checklist</u> and will advise and guide Service Delivery Units in developing data sharing agreements that cover specific requirements, suitable to their needs. This standard data sharing agreement checklist and associated guidance is available on the <u>Information Governance intranet page</u>.
- In order to ensure that information sharing takes place in an appropriate manner, all data sharing agreements should be approved by the relevant Assistant Director/Service Delivery Manager and comply with Information Governance requirements and the Information Commissioners Code of Practice on Data Sharing.

6.5.1 Receiving and sending confidential/personal information

Council staff have control over confidential/personal information they send to other parties. It is critical that appropriate security measures are in place before information is sent out. Staff have little control over how other organisations or the public may send confidential or personal information to the Council. Staff must:

- post send information via special delivery, or if sensitive or a large number of personal details are included, use a reliable courier who will deliver to a named recipient only. Consider hand delivery if local, to someone known to you. Senders should be encouraged to send confidential/personal information to the Council by special delivery/courier.
- email only use secure email accounts such as GCSX and the Secure Communications System (SCS) to send personal information. Also recommend to senders that they use encryption/password protection for documents and where possible use secure email accounts such as GCSX or the Secure Communication System (SCS).
- fax only to be used in exceptional circumstances. Should send to a known fax number only and verify the number before sending. Ask if the fax is a safe haven (area that is secure and accessible only by authorised staff). If not request that the recipient stands and collects the fax as it is received. Also discourage senders from using faxes.

7. Physical and Environmental Security

- 7.1 All officers have a responsibility for the physical security of Council's assets (including information) including securing their laptops, locking away sensitive information, etc. Some service areas have additional responsibilities including Facilities Management (building security), ICT (systems and IT infrastructure security) and IG (advising on security arrangements for information).
- 7.2 ICT will be responsible for the provision of suitable physical, technical, procedural and environmental security controls in line with best practice such as ITIL (Information Technology Infrastructure Library standard for IT service management) in order to prevent unauthorised access to, interference with, or damage to information.

7.3 Access Control

7.3.1 Service Delivery Managers have responsibility for authorising their own staff to access information including IT networks, offices, secure filing cabinets etc. No

STLAW.069 Page 6 Version 1.0 March 2019

- Council employee may access or attempt to access any information for which they have not been given authorisation.
- 7.3.2 Service Delivery Managers will remove access to information during periods of extended leave or sickness of more than 3 months. A review of employee's level of access to Council information must be undertaken by their Service Delivery Manager at least during the 121 process.
- 7.3.3 Additional security measures shall be implemented by data owners to control access to especially personal/sensitive Council data.
- 7.3.4 To control access to information, care must be taken (within the constraints of new ways of working) as to the physical positioning of desks and equipment used to view key personal, sensitive or confidential data. Desks used to process or view such data must be positioned away from doors/windows and public areas.
- 7.3.5 Service Delivery Managers must ensure appropriate access controls are in place for information processed in open plan offices. Adequate clear desk arrangements should be adhered to as outlined in this policy.

7.4 Physical security (equipment)

- 7.4.1 Desktop machines in public areas must be secured to protect against theft or unauthorised access.
- 7.4.2 Multi-Functional Device (MFD) machines must be sited appropriately in areas where sensitive information can be handled.
- 7.4.3 Backup equipment and media must be sited at a safe distance to avoid damage from a disaster at the main site and must be subject to the same environmental and physical protection as the main system.

7.5 Security of premises

- 7.5.1 Access to areas containing sensitive Council information must be strictly controlled and given on a need to know basis. A record of privileged access granted to nominated individuals will be kept by the respective Service Delivery Manager where necessary.
- 7.5.2 Physical security (door locks, locked cabinets, security card access) is the responsibility of all employees. Doors and windows must be locked as and when appropriate and blinds or curtains in place, with external protection considered for windows, particularly at ground and lower ground level.
- 7.5.3 All staff are issued with identity badges which include a photograph and these must be worn visibly at all times when working in Council buildings. Staff must question anyone in any Council building not wearing identification, where they are confident to do so. If staff are not confident in approaching someone, they must inform Facilities Management or their line manager immediately. Staff must understand that they may be asked for identification at any time.

STLAW.069 Page 7 Version 1.0 March 2019

- 7.5.4 Access to Council premises is controlled by the issue of security passes or FOB's. This is managed by Facilities Management. Service Delivery Managers must inform Facilities Management of leavers in order that swipe cards / FOBs can be deactivated. In addition Service Delivery Managers must return leavers' swipe cards / FOB's to Facilities Management.
- 7.5.5 Passes for visitors are controlled by Reception. Visitors to Council offices must not be allowed to wander around the buildings and must be accompanied at all times. They must sign in and out at Reception and wear identification badges visibly at all times when progressing beyond public areas.

8. Loss or Theft of Equipment/Files & Information

- 8.1 In the event of any loss/theft of equipment, files and information, the Council's Information Security Breach Procedure should be followed. The key immediate actions include:
 - Theft of equipment should be immediately reported to the police (obtain crime number) and to your SDM (or line manager if SDM unavailable) and ICT.
 Your line manager will then inform Insurance and IG.
 - Theft/loss of files or information should be reported to the relevant Service Delivery Manager and IG.

Staff/User Access Management

9.1 Staff registration

9.1.1 The Service Delivery Manager or data "owner" must authorise access to information / systems for the provisional user with access being granted on a 'need to use' basis in order to carry out their duties. Access should not be granted prior to authorisation being given.

9.2 Password responsibilities

9.2.1 Good, secure passwords are essential and staff must be aware of what constitutes a suitable password. The Council's Password Management Policy should be adhered to at all times, see link to this policy on the IG intranet page. In summary:

Passwords must be:

- Changed regularly or immediately if there is any doubt at all that a password may have been compromised
- Kept confidential and never shared
- Changes at the first opportunity from default assigned passwords
- At least 8 characters long and complex, i.e. not be a simple word, name easily associated with you and contain numbers, a mixture of upper and lower case characters and allowed symbols

Passwords must NOT

- Be easily guessable, and this includes dates of birth, family names, pet names, or other personal details
- Be shared with anyone else
- Be the same as your system user id
- Re-used on an alternate basis

Passwords should NOT

- Where possible be written down
- Where possible be duplicates of passwords used for other systems.

The use of generic accounts and passwords for staff must be referred to ICT. ICT will consult with Information Governance on the validity of the request.

Staff can reset their own password using Certero. Staff can also allow a colleague to reset their own password via ICT SelfService. Staff are advised to not leave their colleague unattended if this occurs.

9.3 Leaving procedure

- 9.3.1 When staff leave the Council, as part of the Council's leavers procedure their manager is required to:
 - Ensure that any information held in the leaver's homes drive (H drive) or One Drive, that is of importance to the Council, is moved to a relevant network folder
 - Request accounts to access corporate systems to be deleted/disabled
 - Ensure email accounts/contacts and membership of email group accounts are removed and, if appropriate, emails will be auto-responded to providing alternative contact details

9.4 Non-electronic media

9.4.1 Paper media (including carbon copies, computer printouts) containing information that is classified as personally identifiable or sensitive must be shredded on site. Disposal should be in line with the Council's Corporate Information Retention Schedule.

9.5 Disposal of equipment

9.5.1 ICT equipment for disposal must be reported to the ICT Service Desk to enable them to arrange secure disposal. ICT equipment no longer required must not be used by staff for personal use.

9.6 Third party access to systems

- 9.6.1 It is the responsibility of data owners or Service Delivery Managers in conjunction with ICT to authorise third party access to resources and systems. User accounts and passwords will have to be created and where necessary relevant policies will have to be signed by the Council and the third party prior to allowing access.
- 9.6.2 It is the responsibility of the relevant Service Delivery Manager to advise ICT as soon as the third party access is no longer required.

9.7 Internet and intranet web publishing

- 9.7.1 Some staff will be authorised to publish data on the corporate Intranet and Internet. This privilege must not be shared with staff who are not authorised to publish information.
- 9.7.2 Service Delivery Units are responsible for content which is published and must ensure that the information is correct, timely and relevant and is published in plain English.

STLAW.069 Page 9 Version 1.0 March 2019 9.7.3 Inappropriate, illegal or offensive material must not be published. This will be removed and may result in disciplinary action being taken against the offender.

10. Working from Home and Mobile Working Overview

10.1 There is a difference between "working from home" and "home working" and "mobile working".

Working from Home

Work undertaken for limited periods but officer remains office based.

Home Working

Officer's normal place of work is their home and they do not visit the office daily.

Mobile Working

Officer travels as part of their role and will require access to Council facilities (network) whilst travelling.

Staff authorised as mobile workers or who may work from home **must**:

- Adhere to the Council's home working and remote working guidance documents which can be found on the intranet
- only use Council equipment to do their work unless accessing corporate cloud services
- ensure that all equipment and information is kept secure at all times, including ensuring that any equipment or information is not left "on show" in parked cars etc,
- never connect their Council equipment to any other network (unless it's a home network to access corporate cloud) or non-Council equipment including personally owned equipment
- never send any work information of any type to "non-work" email addresses
- never dispose of any used media off-site it should be disposed of via ICT
- 10.2 Staff are responsible for ensuring that unauthorised persons are not able to view confidential information or use Council equipment. This includes family members and staff from other organisations.
- 10.3 Use of any confidential information at home must be for work purposes only. If the use of confidential information at home can be avoided, then the information should not be taken home.
- 10.4 Staff must ensure that when storing equipment/information at home, it is kept as secure as possible and if available is stored in a locked container.

11. Security Responsibilities for Staff and Delivery Units

11.1 All managers must make it clear to their staff, where the job description is not explicit, the level of responsibility that they have for information that they handle. This includes compliance with key elements of this policy including:

STLAW.069 Page 10 Version 1.0 March 2019

- **11.1.1 Password management –** see section 9.2 of this policy and Password Management Policy.
- **11.1.2 Encryption and cryptographic controls -** Appropriate encryption to be used to communicate / transfer data outside of the authority.
- 11.1.3 System implementation and software purchase all system implementation and software purchases must be undertaken via the ICT Service Desk. Any projects that include the possible use of new computer systems/applications must engage ICT prior to discussions with suppliers.
- **11.1.4 Clear screen and clear desk -** Staff must ensure that they lock their PC screen when leaving their desk for a limited time, or log out when leaving for extended periods. Council systems have an automatic lock out facility on PC's that do not need to be constantly logged on that will activate after several minutes of inactivity.

Desks and other spaces must be kept clear of any confidential information at all times when the information is not being used and you leave your desk for a short period and locked away out of sight after a longer period.

- **11.1.5** People Services employment checks All appointments must comply with Council recruitment policy and include verification of an employee's identity, qualifications, employment history and eligibility to work in the UK.
- 11.1.6 Confidentiality agreements As part of all employee's terms and conditions of employment, there is a requirement to maintain confidentiality of information both during and after their employment. Casual staff (including contractors/ agency staff) and third parties (including volunteers) not covered by an employment contract are required to sign a confidentiality agreement prior to being given access to information processing facilities. All such staff will be informed about the need to, and method for, maintaining confidentiality regardless of what access their role gives them to information.
- 11.1.7 Terms and conditions of employment Employees of the Council are expected to be aware of and comply with the all the codes of practice included within the Employee Code of Conduct, which includes responsibility for information security. Employees should also be aware that responsibility for information security continues beyond the end of their employment with the Council and extends to all places and all times, including outside work. Breach of confidentiality can lead to summary dismissal within the Council's disciplinary procedure.
- **11.1.8 Training** All staff must ensure they complete the IG module on Ollie and keep up to date with IG policies and guidance.

12. Monitoring System Access, Use and Auditing

12.1 All systems may be monitored to detect unauthorised activity or potential security breaches.

STLAW.069 Page 11 Version 1.0 March 2019

- 12.2 Logged events may be reported to Information Governance and action taken if breaches or suspected breaches occur.
- 12.3 Monitoring will be undertaken in accordance with legislation (Lawful Business Practices Regulations 2000 and Regulation of Investigatory Powers Act).
- 12.4 ICT and Audit & Governance reserve the right to monitor, log, collect and analyse the content of all transmissions on networks/applications, including internet and email/Skype usage, at any time for system performance and fault diagnostic purposes as well as to detect unauthorised use of systems and to ensure that systems are being used in accordance with acceptable use policies.

13. Communications & Operations Management

13.1 Illegal copying

13.1.1 Subject to the Council's duty under Freedom of Information legislation officers may not copy materials (including newspapers) protected under copyright or patent law or make any materials available to others for copying. Officers are responsible for complying with copyright or patent law and applicable licences that may apply to software, files, graphics, documents, messages and other materials you wish to download or copy.

13.2 Communication of trade secrets

13.2.1 Unless expressly authorised to do so staff are prohibited from sending, transmitting or otherwise distributing proprietary information, data, trade secrets or other confidential information belonging to the Council or any other organisation.

13.3 Housekeeping

- 13.3.1 Service Delivery Managers should be aware of equipment, information or software that is taken off site. In all cases those personnel taking Council property off-site will be responsible for the security of such equipment/information at all times.
- 13.3.2 Individuals must be made aware that they may face disciplinary procedures that could lead to dismissal if found responsible for the theft of equipment, software or Council information.
- 13.3.3 Staff handling personal/sensitive information must take extra measures, e.g. encryption, password protection, use of lockable storage, etc, to ensure information in their possession remains private and secure in order to comply with the Data Protection Act 98 (replaced by General Data Protection Regulations [GDPR] from 25/5/18).
- 13.3.4 The unnecessary processing of sensitive personal data in an identifiable form must be avoided. Service Delivery Managers are responsible for drawing up procedures for their area of work.
- 13.3.5 Documents and records must be stored under secure conditions up until the point that they are either destroyed/shredded at work or passed to a third party to carry out

STLAW.069 Page 12 Version 1.0 March 2019

- physical destruction. This means that they must not be left unsecured in skips, bins, reception areas, corridors etc.
- 13.3.6 Sensitive or confidential information must not be recorded on voice mail systems.
- 13.3.7 All employees should be aware of the risk of breaching confidentiality associated with the photocopying (duplication) of sensitive documents. Authorisation from the document owner must be obtained where documents are classified as 'highly confidential' or above.

13.4 Storage

- 13.4.1 All personal data stored electronically must comply with the Data Protection Act 1998 (or GDPR from 25/5/18).
- 13.4.2 The information created/stored by the Council must be retained for a minimum period that meets both legal and business requirements as set out in the Corporate Information Retention Schedule.
- 13.4.3 Data is to be protected against loss, unauthorised or accidental changes, and may only be destroyed in accordance with data retention and destruction policies.
- 13.4.4 Hard copy documents that require archive storage should only be held in the corporate storage unit (Unit B4 Stafford Park 11).

13.5 Audit trails

13.5.1 To protect both staff and the Council, all systems have clear audit trails. This is particularly important for staff with administration rights.

13.6 Complying with legislation

- 13.6.1 Everyone has an obligation, under legislation such as Freedom of Information and Data Protection Acts (and GDPR from 25/5/18), to deal with information in the stipulated way. Further guidance on this can be obtained from Information Governance.
- 13.6.2 It is the responsibility of Service Delivery Managers to make sure that staff are aware of any specific legislation applicable to their role including data protection.

14. Outsourcing

- 14.1 Any outsourcing must be with reputable companies that operate in accordance with quality standards. Such an undertaking must include a suitable Service Level Agreement (SLA), which meets the Council's requirements. Where the processing of personal data is outsourced, a data processing agreement should be in place.
- 14.2 Where outsourcing includes the use of cloud computing the provider must provide assurance that cloud arrangements comply with recognised cloud security standards.
- 14.3 Any agreements or contracts must make it clear to the outsource organisation what their obligations are in respect of the Data Protection Act 1998 (GDPR from 25/5/18), Freedom of Information Act 2000 and other relevant information related legislation.

STLAW.069 Page 13 Version 1.0 March 2019 14.4 Outsourcing that may take place where information crosses outside UK and European borders must take into consideration the requirements of principle 8 of the Data Protection Act 1998 (GDPR from 25/5/18) – the restriction of movement of personal data across boundaries outside the European Economic Area (EEA). This maybe particularly relevant to new technologies such as cloud computing.

15. Systems Development & Maintenance

15.1 Controls will be implemented to ensure that security requirements are considered when developing existing information systems and prior to introducing new ones.

15.2 Information governance (IG) requirements of systems

15.2.1 IG will be involved in the development of new information system functionality (including new systems and development to existing systems) and processes that include the processing of personal information to ensure that all governance requirements are included.

15.3 Data input

15.3.1 Line managers will have responsibility to ensure their staff are aware of processes and procedures relating to quality of data input in line with local data quality policies / requirements.

15.4 Data output validation

15.4.1 Staff must undertake data quality checks on data output to ensure it is accurate/ up to date and complies with any local policies on data quality.

15.5 Security/Privacy requirements within projects

15.5.1 Project Managers are required to undertake a risk assessment/Privacy Impact Assessment (Data Protection Impact Assessments from 25/5/18) to identify security/data protection requirements for new Council systems that process personal information.

15.6 Test environments and test data

15.6.1 Any systems being tested, or developed and tested will be separated from live systems. Live data will not be used and on logging in, the user(s) will be informed that they are in a testing environment. Where development of systems occurs via a third party, there will an expectation that all testing will be completed to the relevant ISO standard.

16. Business Continuity

16.1 The Council has a process for management of business continuity across the Council.

STLAW.069 Page 14 Version 1.0 March 2019

- 16.2 Strategic and service area/team continuity plans must be in place to ensure continued access to, and protection of, service critical information.
- 16.3 For information on business continuity please access the <u>business continuity page</u> of the intranet.

17. Legal, Regulatory and Contractual Compliance

- 17.1 To avoid breaches of any criminal and civil law, statutory, regulatory or contractual obligations and any security requirement, compliance with this policy is mandatory. Failure to comply with policy requirements will be viewed as a breach of security. Any such event may be the subject of investigation and possible further action in accordance with the Disciplinary Procedure.
- 17.2 All parts of the Council will be subject to review to ensure compliance with this Policy. Audit & Governance may commence an investigation when the conditions of use have or may have been broken. Dependent on the circumstances staff may not be informed of the investigation. Whilst the investigation is under way, the staff member or account concerned may have their access rights suspended or reduced. If this occurs, the staff member will be informed.

17.3 Intellectual property rights (IPR) (also refer to section 13.1.1 of this policy)

- 17.3.1 Intellectual property rights include, but may not be limited to copyright, design and patents and trademarks.
- 17.3.2 Staff will not load software, video and audio files onto Council systems without authorisation from ICT and that authorisation will include checking that any IPR has not been broken by the use of the software.
- 17.3.3 Licences for systems will be adhered to; including making sure that any restrictions in the number of users for a particular piece of software are complied with.
- 17.3.4 Copies of software and systems will not be made by staff unless authorised to do so by the licence holder and ICT.

17.4 Management of records

17.4.1 Information such as financial records, employee records, customer records and any records that are publicly accountable will be kept in accordance with ISO15489 records management recommended retention periods detailed in the Corporate Information Retention Schedule.

17.5 Data protection and personal information

17.5.1 All personal information managed by the Council is covered by the Data Protection Act 1998 (GDPR from 25/5/18). This provides legislation as to how personal information may be used, stored, processed and shared. It contains eight principles (GDPR contains 6 principles) that the Council should conform to and also governs how information needs to be handled under certain circumstances.

STLAW.069 Page 15 Version 1.0 March 2019

17.6 Freedom of Information (FOI)

17.6.1 The FOI Act 2000 governs access to non-personal information in public organisations. Any request for information to any member of staff, in written form, is a request under this legislation. Staff must respond to these requests if they can answer the question quickly (opening times of offices etc) – known as business as usual requests. If it is a more in depth enquiry, or a decision is made to withhold information then the request should be passed to the IG team (foi@telford.gov.uk)

17.7 Environmental Information Regulations

17.7.1 The Environmental Information Regulations (2004) covers the provision of information that is environmental in nature.
