

# Class 2

We have continued our learning in Maths with work on adding. While the Year 2 children are learning to relate facts they know within 10 to numbers within 100; for example  $3 + 3 = 6$  so  $30 + 30 = 60$ , the children in Year 1 have been securing their counting forwards within 20. The pictures to the left are a snapshot of a lesson where the children collected objects for a number sentence (for example  $5 + 3 = \underline{\quad}$ ) to help them physically count the answer.

In Computing this week, the children have been learning the skills of animation as we complete the unit: Introduction to Animation. Last week, the children created some wonderful octopus models which we will be using to retell our focus story Captain Toby using a stop animation app. This week, we have been learning the skills and creative techniques that we will be using for this project.

Look at our sea creature puppets!
