

Class 2

We have started our unit on Materials in Science this week. The children have been full of enthusiasm for this topic; asking questions and commenting on their findings.

As the unit progresses, Class 2 will learn about the properties and features of different objects and materials. We will also investigate why certain materials are used for certain objects.

In Forest School this week, the children were transported on a magic carpet to different places around the world. They picked places the magic carpet may take them and then used natural resources to create these places. The children used excellent creativity and design skills to construct the places they visited.
