

Class 4 Weekly News

This week has been a very practical week for Class 4! During the week, we finished our Science unit on Mixtures and Reactions, carrying out a number of practical experiments such as testing the solubility of different substances, exploring methods for separating mixtures, and finding out what conditions are needed for rusting. Also this week, our resident art, Henry, was in school and Class 4 explored the art method of papier mache. Year 5 and 6 used this composite material to design a shield boss to bring their Roman shields to life. Next week, we will finish the painting of these to conclude our Autumn Roman topic.
