

Class 1

This week the children have been immersed with so much wonderful learning about space. They have been fascinated learning about the solar system and planets, their distance from the sun and their sizes. They made a class model of the solar system and can remember so many facts about the planets. In phonics children learnt the digraphs 'oo' and 'oo' and have worked so hard identifying the correct digraph in words.

The children had so much fun junk modelling and painting their wonderful space creations

Esmæ: "Neptune is furthest away from the sun, it's very cold on this planet."
