

Class 3 Weekly News

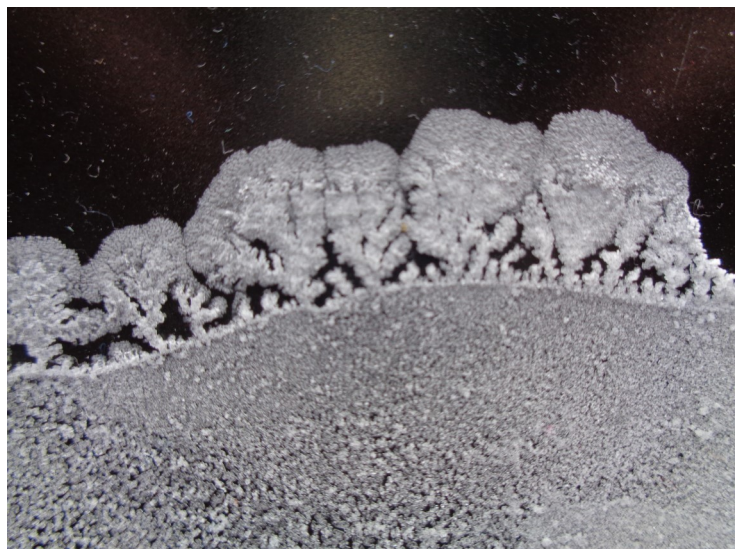

Class 3 Weekly News

In Class 3 this week, children have been continuing their 'Rocks' topic in science and have carried out an experiment using rock salt.

We poured boiling water over the rock salt until it dissolved and made predictions about what would happen when the water evaporated. Over the week, the children have seen rock crystals forming and compared them to frosty trees on a hillside!

Class 3 enjoyed the experiment and were excited to see the crystals.

Day 4 of experiment

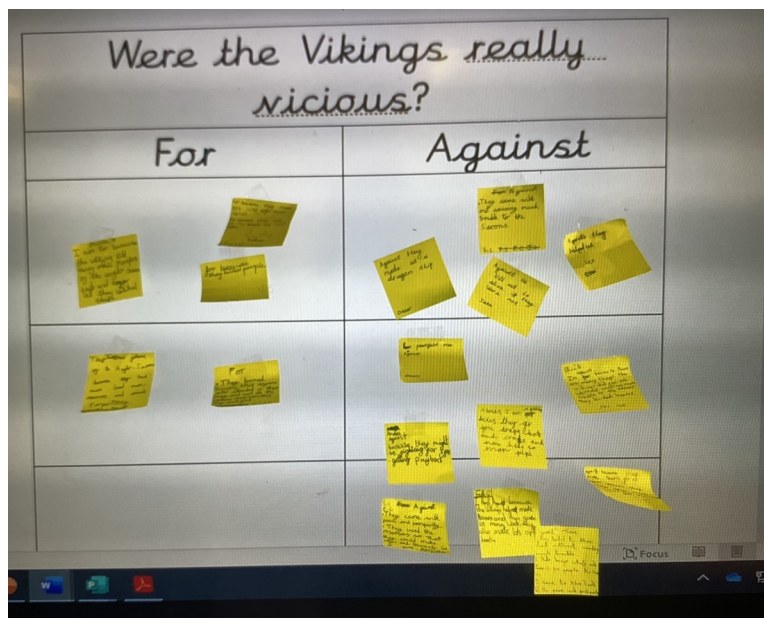

We also used a digital microscope to view and analyse our rocks in closer detail. Class 3 were amazed to see how colourful and detailed the grains were when zoomed in! This is what we saw...

In English, we have been continuing our debate writing and focussed on the argument... 'Were the Vikings really vicious?'

Children discussed reasons for and against this question and used what they have learnt in their topic to justify their reasons.

Class 3 have produced excellent homework this week, designing Viking shields. Here are some of the designs...

Well done Class 3!
