

As part of Science Week in Class 2, we discussed the achievements of Maggie Aderin-Pocock. We looked at her love of space and discussed astronomy equipment such as telescopes and yesterday's full moon.

We used Maggie's drive, passion and achievements to think about our own dreams for the future. Here are some of our dreams:

My dream is to be
an Olympic Athlete.

My dream is to
make more time for
mummy.

My dream is to fly
helicopters for the
army.
