

# Class 4 Weekly News

This week, we have celebrated British Science Week and Class 4 have learnt about Rosalind Franklin and her contribution to Science. We learnt all about DNA and completed a STEM activity where the children used origami to replicate a virus (see below). Also this week, Year 5 and 6 attended a brilliant STEM day at RAF Cosford where they took part in a range of Maths, Engineering, Science and Technology activities. A brilliant week of Science. Well done to all children.

As part of Women's History Month, Year 5 researched a female figure who they believe has impacted our lives today. The children then presented their research to the rest of the class. We had presentations from Jane Austen and Harriet Tubman to Joan of Arc and Rosa Parks. Well done Year 5!
