

# Class 3 Weekly News

Today the children dressed up for Superhero Day in aid of the charity PreventALL. The children made such a fantastic effort dressing up as their favourite hero. We had a wonderful range of heroes from a Police Officer to a Dad and even Kindness Girl! We raised lots of money for a really worthwhile charity—so thank you very much!

## Maths

In maths this week, class 3 have been finding the area of rectangles. They began by counting squares and moved on to using their times table knowledge to support them with their methods. All children understood the concept and had a great go in tasks this week. Well done!

## D-T

In DT this term, we will be looking at

British inventors. We discussed different inventions such as the telephone, light-bulb and vehicles.

Then, we invented our very own phone using a string and cups. The children (and teachers!) were amazed with how clear voices could be heard by using such a simple invention! Children are now thinking of their own invention to discuss next week.
