

Class 4 Weekly News

This week in Class 4, Year 6 have started working on their Leavers assembly and Year 5 visited Adams Grammar, engaging in a wonderful Science workshop and learning all about the history of the school. In RE, we have started our final unit on Sikhism and in Geography we have started our final unit on global warming. This week the children have learnt about what global warming is, vocabulary associated with this, why this problem exists, and the problem of worldwide rising sea levels. Both year groups have taken part in thoughtful discussion throughout the week. Well done Class 4.
