

Class 3 Weekly News

Class 3 Weekly News

This week in class 3, we have had a wonderful week looking at persuasive writing in the form of travel brochures. We have also been adding to our art knowledge and skills by re-visiting collage and learning how to create perspective in our landscapes.

Class 3 have re visited our art topic of collage. In groups, the children gathered natural items in the quiet garden and used their knowledge of collage to create volcanoes.

During PHSE this week the children have been exploring what it means to eat a healthy and balanced diet. After a talk time discussion, the children decided on the 5 main food groups. They were given lots of different types of food and asked to categorise them into the 5 main food groups. When the children had done that, they compared their efforts against the NHS eat well guide. Some of the children were shocked that potatoes were actually in the carbohydrate groups and not the vegetable group. Lots of the children thought that chocolate should be in the dairy group!

Whilst the weather was dry this week, Class 3 went out to the school field to continue our art subject of landscapes. This week, we have been focusing on perspective and how to create depth in our drawings and paintings by using the oak tree in the school grounds. We still need to finish our sketches ready to paint in water colour, but we made a very good start.
