

Class 1

The children have had a super penultimate week of term and so keen to keep learning. In maths we have explored the concepts of sharing into equal groups and doubling numbers in a very practical way. We have also enjoyed our pedestrian training to learn how we can stay safe on the roads. The children have also loved sharing their wonderful African inspired homework projects, we are making a display of them in school (photo to follow.)

We were inspired by the fruits in 'Handa's Surprise' and followed our designs of a repeating pattern to make fruit kebabs. We had lots of fun peeling, chopping and threading the fruits as well as eating them for a healthy snack!

"I'm chopping up the watermelon for my fruit kebab. They're delicious." Rosa

"Niamh and me are doubling 8. Niamh needs 8 in her circle too. Double 8 is 16." Elsie-Mai

"My repeating pattern is kiwi, strawberry, mango. These are my favourite fruits." Esmae
