

# Class 1

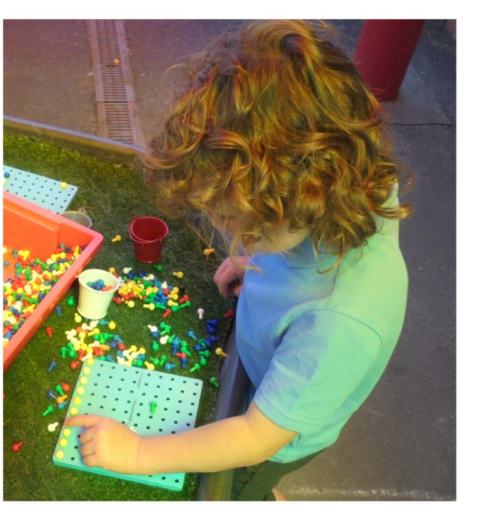

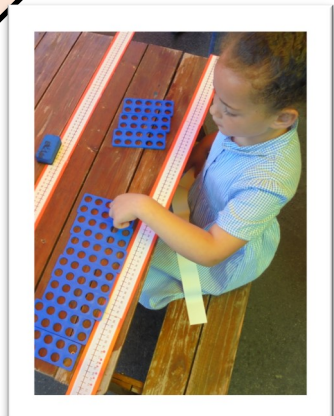

This week the children have enjoyed telling me all about their new class and classroom following their transition sessions to Class 2. They have also been exploring the concept of 100 through practical activities so this week our class newsletter puts a spotlight on Maths to showcase all our wonderful learning. Well done Class 1!

Jack made 10 different coloured towers using multi link. Each tower contained 10 cubes. He then counted in 10's and labelled each tower.

"I need 10 pieces of this Numicon to make 100. Each piece is 10." Ella

"There are 10 pegs in the line, when the line is full its 10 so I need to keep going until there's 100." Harrison

"We're putting 10 pieces of pasta in each square. We have 10 squares so that will be 100." Rosa
