

Class 3 Weekly News

Class 3 Weekly News

This week, we have been enjoying our class text and exploring the techniques used in the writing. We have been writing similes to describe the Iron Man. We analysed a text to help us understand the features of the narrative.

In science this week, we have been identifying push and pull forces and investigating magnitude on an object. We understood that the higher the magnitude, the faster the car, the lower the magnitude, the slower the car.

We also investigated how pushing and pulling can change the shape of an object.
