

# Class 2

This week, Class 2 visited the Blue Planet Aquarium. The children were incredibly excited and were amazed at the underwater sights they experienced throughout the trip. Our trip included watching rays being fed and walking through tunnels underneath sharks! It was a lovely day full of learning and memories.

In Maths, our work on Logic Problems took place this week and the children showed good understanding of how to tackle these types of problems.

In Geography, we created depths of the ocean shoeboxes after also learning about South America, the Amazon River and Asia.
