

Class 2 really enjoyed their visit to Blue Planet Aquarium on Wednesday and it really brought to life their topic 'What is lurking beneath the ocean?' Children explored the exhibits and got to see a myriad of sea life. The children were enthusiastic and asked so many interesting questions, We were so very impressed with them.

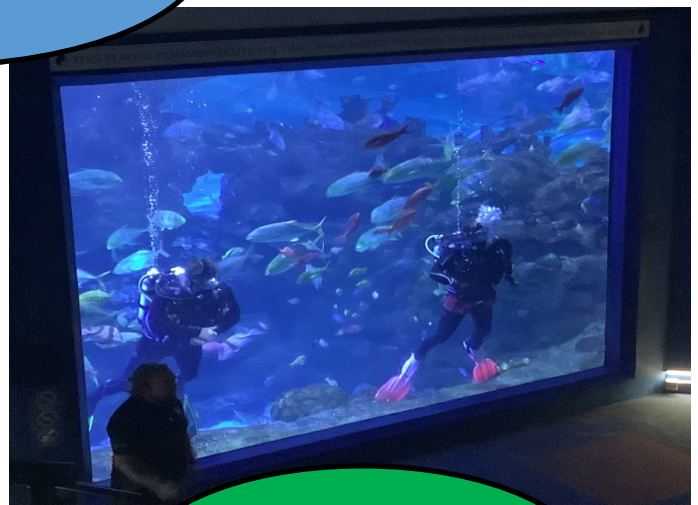

The sea creatures in the water were amazing! - Faith

I really liked the stingrays and the way they spun round and turned upside down - Eric

I found out that an octopus has three hearts and the starfish doesn't have a brain!

I loved the aquarium because it was fascinating - Darci
