

# Class 4 Weekly News

What a practical week Class 4 have had this week!

Earlier in the week, Year 5 and 6 worked hard on their Science unit 'Mixtures and Reactions'. We had such fun testing which materials dissolve and which are insoluble, investigating if hot chocolate will dissolve quicker under certain conditions, investigating the difference between melting and dissolving jelly and setting up our 'sewage plant' in the classroom where we investigated various ways to separate materials!

This week we also completed our DT sewing unit where we made waistcoats for teddy bears! The children particularly enjoyed showing their designs off to all of the younger Key Stage 1 children. See photographs of our finished waistcoats below.

Yesterday, we visited Millichope Estate and took part in a Geography fieldwork exercise. You can read more about this on the main newsletter. Well done Class 4 for a fabulous week!
