

Class 1

What a wonderful week of learning! In maths and Treetops Tuesday the children have been using vocabulary to compare length and height. They also had lots of fun creating their own habitats for bears and playing in the tuff trays including an ice tundra and a forest. We have also learnt about local teddy maker Merrythought and drew some of their famous bears as well as some fantastic writing.

Arthur said: "Pandas like to eat grass and live in forests." Ivy said "This stick is the longest and this stick is the shortest." Freddie R said "This tower is shorter than the other one."
