

Class 2

This week in class 2 we have been learning about money and the value of different coins in maths. In DT the children have started a new unit and have explored features of structures and the stability of different shapes. In History the children have been so interested to learn about the different royal residences and have located where they are on a map of the UK and written a fact file about Buckingham Palace. Super work!

Arianna said "We found out that the was the most stable because of the shape's base." "The sphere was the least stable because when we trying to measure it, it just fell down straight away."

Some interesting facts about Buckingham Palace:

"Prince Albert requested a balcony which was added in 1847."(Oliver) "It was built in 1761." (Faith) "It is a very famous landmark in London." (Bea) "The royal place has 775 rooms and 73 bathrooms (Eric and Lily.)"
