

Class 3 Weekly News

Another busy week in Class 3! This week we have been investigating shapes in maths and did a scavenger hunt to find examples of polygons around our school. In English lessons, we have used dictionaries to find the meaning of some new words that appear in our class text and have created freeze frames to show characters actions in the story.

Some of our class took part in a football afternoon on Wednesday whilst the remaining children created some colour wheels using the technique 'pointillism'.
