

Class 3 Weekly News

What a fantastic week we have had in class 3! We started off the week with sports day and I was proud to hear how much effort the children put into their races!

We have been investigating symmetry and 3d shapes this week and the children have excelled themselves applying their mathematical knowledge in the real world and in their science lessons.

In English, I enjoyed reading the children's letters about a trip or adventure that they had been on.
